

VERY SLIGHT IMPROVEMENT

A DISCOVERY ABOUT THE PRESIDENT'S WOUND REVEALS ANXIETY.

Not Holed, as was supposed, but Stopped by a Valve of Tissue—A Possible Explanation of Last Week's Trouble—The Patient Passes a Very Quiet Day—The Situation Remains Without Change and Steady.

WASHINGTON, Aug. 20.—The news that we have had from day to day from the White House cannot be called reassuring. The best that can be said is that the President is not in a dangerous condition. The apparent permanence of this situation finally led the surgeons to believe that the depths of the wound had healed, or at least that the track of the ball had healed at the point where the rubber catheter was stopped. A few days since, however, it was noticed that the quantity of pus which was coming out of the wound had been reduced. This was a very important discovery, as it showed that the wound was healing, and that the quantity of pus which was coming out of the wound was not so great as it had been.

It also indicated that the obstruction which prevented the passage of the catheter inward did not interfere with the flow of pus outward from the deeper and unhealed interior. The low temperature of the pus, and the fact that the surgeons were able to draw it out, showed that the wound was healing, and that the quantity of pus which was coming out of the wound was not so great as it had been.

It was a very important discovery, as it showed that the wound was healing, and that the quantity of pus which was coming out of the wound was not so great as it had been. THE WEST HAVEN MYSTERY.

THE STORY OF NEWLY-DISCOVERED WITNESSES IN THE CASE.

Miss Sperry's Account of the Dead Girl's Appearance at Redcliffe's on the Night of Aug. 4—Prisoners of the Investigation.

NEW HAVEN, Aug. 20.—The only fact of importance developed by the Cranford investigation is the discovery of the man and woman who were in Redcliffe's restaurant on Thursday night, Aug. 4, the evening when, according to the manager of the restaurant, Jennie Crowder, Blanche Douglas, and Walter Miller were there, and who have been sought several days through an advertisement inserted by Lawrence Dwyer, counsel for the Malaga, in the New Haven papers. The advertisement, printed under the head of "Information Wanted," was as follows:

"The persons who were at Redcliffe's about 10 o'clock on Thursday night, Aug. 4, are requested to come forward and identify the person or persons who were with them at that time. If they do so, they will be rewarded with a sum of money. If they do not, they will be prosecuted for perjury. This is a very important case, and the public interest requires that the truth should be known. If any person has information, please contact the police at once."

The discovery of the couple, it was announced yesterday, was made by the police. One was a musician, playing in the American Band. His name is Charles T. Howe. The other was Miss Bertha Sperry, who is employed by Hines's Sewing Machine Company in the Main Building in Chapel street. Mr. Howe was in town at that time, and was made for him to meet the Malaga lawyers.

Miss Sperry was seen by a reporter yesterday. She said she was with Mr. Howe in Redcliffe's on the night in question. Although since Jennie Crowder's death she had talked over with Mr. Howe, she did not remember the details of the night. She said she did not remember the details of the night, but she did remember that she was there, and that she was with Mr. Howe.

It is a very important discovery, as it showed that the wound was healing, and that the quantity of pus which was coming out of the wound was not so great as it had been. The surgeons were able to draw it out, and the low temperature of the pus, and the fact that the surgeons were able to draw it out, showed that the wound was healing, and that the quantity of pus which was coming out of the wound was not so great as it had been.

NEWS FROM THE OLD WORLD.

FARNELL'S BITTER ATTACK UPON MR. FORSTER IN THE COMMONS.

The Motion for Davitt's Release Debated—Forecasting the Result of Parnell's Election in Spain—Egypt's Cabinet Crisis.

LONDON, Aug. 20.—In the House of Commons last night, in the debate on the vote for the salary of the Chief Secretary for Ireland, Mr. Parnell said he thought that Mr. Forster was more detected by a large body of the Irish people than any of his predecessors, on account of the mode in which he had conducted the Government's policy, but the general law of the country. With regard to the future, he said that if the Land bill brought about a substantial amendment of rent, the Irish people, he thought, would make the best of it, and would use it as an instrument for the attainment of a complete reform. Messrs. Dawson, Redmond, and Parnell, Irish members, joined in condemning Mr. Forster in language more or less strong. Mr. Parnell declaring that Mr. Forster's name was held in execration, and that he had worked the Correlation to stifle the Land League.

It was a very important discovery, as it showed that the wound was healing, and that the quantity of pus which was coming out of the wound was not so great as it had been. The surgeons were able to draw it out, and the low temperature of the pus, and the fact that the surgeons were able to draw it out, showed that the wound was healing, and that the quantity of pus which was coming out of the wound was not so great as it had been.

SARATOGA OVERFLOWING.

Vanderbilt and Jay Gould, Gov. Hendricks and David Davis Among the Victims.

SARATOGA, Aug. 20.—The crush here continues. The city is overflowing with visitors, and the weather is cool and delightful. A continuous line of vehicles stretched down the Grand Union Hotel. Among the many four-in-hands, one of which was driven by a Spanish nobleman, who chartered it for a select party. Hundreds lined the streets to catch a view of Wm. H. Vanderbilt, who drives out every evening. He is usually accompanied by Foster Dower. Jay Gould bobbed along in a little dog cart, accompanied by a mysterious young gentleman with a gray coat, gray hat, and an enormous bottomless hat. To-night Senator David Davis, ex-Gov. Hendricks, ex-Senator Joseph McDonald, Judge Otto Theron Butler, Chief Justice Henderson of Indiana, and other magnates sat on the veranda of Congress Hall, discussing the political situation in the midst of the electric lights, the display of diamonds, and the glow given at the Grand Union Hotel. The garden party two nights ago. The hotels and private houses are full, and the cry is, "Still they come."

It was a very important discovery, as it showed that the wound was healing, and that the quantity of pus which was coming out of the wound was not so great as it had been. A FEVER-STRIKEN HAMLET.

THE RAVAGES OF MALARIAL FEVER IN POQUONNOC.

Nearly Every Home Visited—In One Three Children Lying Dead at the Same Time—A Quarrel Over the Cause of the Malady.

POQUONNOC, Conn., Aug. 20.—A few weeks ago a quiet town of a few hundred people, situated on the shore of a cove of the same name, was the scene of a terrible tragedy. In the space of a few days, nearly every home was visited by the ravages of malarial fever. In some houses three children lay dead at the same time. The entire village became wild with alarm, but not until about a score of families had been visited did the health board of the town (Groton) bestir themselves. About ten days ago residents of Poquonnoc informed the board that they believed the pestilence had been caused by the brush cut on Poquonnoc Cove over the acres of oyster beds. The village is about two miles from the sea, in a low, fertile, fertile soil. A rank, unpleasant odor came over the cove, borne by the wind, and the people of the town were warned to avoid the cove. The board of health, however, did not believe the odor was the cause of the fever. They believed the fever was caused by the brush cut on Poquonnoc Cove over the acres of oyster beds. The village is about two miles from the sea, in a low, fertile, fertile soil. A rank, unpleasant odor came over the cove, borne by the wind, and the people of the town were warned to avoid the cove.
